

7-2-11  
The following exhibits were processed by chemists at the US Army CI lab, Ft Gordon, GA. These chemists were Mrs. Janice S. GLISSON, SP4 Terry L. LASER, SP5 Larry L. FLINK, and SP4 Craig S. CHAKERLAIN. All "Results" refer to blood type unless otherwise indicated.

NOTE: a. The abbreviation's "BRES" and "RES" mean "bearing red-brown stains" and "red-brown stains", respectively.

b. If a stain has the result an indication of one type only, such as "indicated A", this means that the examiner considers the area type A, but has performed only one of the two complimentary blood typing tests (crust test or absorption-elution test)

c. The results of GLISSON'S comparison of Exhibits E-4 and E-5 with Exhibits E-305 thru E-313 are recorded with the results of BROWNING'S analysis, since this deals with hairs.
